# Yuliia Chepizhna

## Senior Product Designer

Kyiv, Ukraine, open to remote | juliashcheka@gmail.com | Telegram @yuliia_chep | linkedin.com/in/yuliia-chepizhna | Portfolio yuliia-chep.github.io

### Summary

Product designer with 9 years of experience in e-commerce, SaaS and healthcare. I design human-first products backed by research and data, from customer-facing apps to admin tools and merchant platforms. I work closely with POs, analysts, developers and stakeholders, and I care about both user value and business results.

### Experience

**Senior Product Designer, MAUDAU** Feb 2024 – Nov 2026
Ukrainian e-commerce marketplace, remote

- Designed the concept of the new mobile app and led the mobile direction: app share of active customers grew from 5% to over 51% in under a year, beating the 30% forecast within six months.
- Ran alpha testing (usability tests and survey, 242 insights) that shaped the roadmap: favorites, personal account and detailed order tracking.
- Created the website redesign concept chosen by stakeholders and validated in 11 customer interviews (8.55 vs 7.41 average score).
- Designed Reorder Flow for web and app with the PO: +30% conversion to repeat orders in an A/B test; Favorites Lists: +23% products added to favorites.
- Designed admin tools and a merchant center (orders, stop lists, moderation, promos) and shipped National Cashback card payments in one week.
- Interviewed candidates and onboarded new designers.

**Product Designer, FuseBase (formerly Nimbus)** Jan 2023 – Feb 2024
SaaS platform for team collaboration and knowledge sharing

- Redesigned the product; the new design is still in production.
- Mentored a junior designer on product thinking and stakeholder work.

**UI/UX Designer, Awesomic** Mar 2022 – Feb 2023
Global design service

- Led several client projects at once, working directly with clients worldwide without a PO: requirements, presentations and feedback.

**UX Researcher, Zakaz.ua** Nov 2021 – Apr 2022
Grocery delivery platform

- Planned and ran interviews and surveys, built personas and customer journey maps, turned insights into product recommendations.

**UI/UX Designer, DOIT Software** Feb 2020 – Oct 2021
Software development company

- Designed Headache Calendar, a medical app for a Norwegian client created with neurologists; still live on my design, rated 4.7 on the App Store.

**UI/UX and Web Designer, Quantixon, Lemon and earlier roles** 2017 – Jan 2020

- Landing pages, web products, redesigns and user research.
