SUMMARY

Product designer with 9 years of experience in e-commerce, SaaS, and healthcare. I design human-first products backed by research and data, from customer-facing apps to admin tools and merchant platforms. I work closely with product owners, analysts, developers, and stakeholders, balancing user value with business results.

5% → 51%
app share of active customers in a year (forecast 30%)

+30%
conversion to repeat orders (A/B test, 100,000+ users)

8.55 / 10
guest score for website redesign concept vs 7.41 baseline

EXPERIENCE

Senior Product Designer — MAUDAU — Feb 2024 – Nov 2026
Ukrainian e-commerce marketplace • Remote

- Designed the concept of the new mobile app and led the mobile direction. App share of active customers grew from 5% to over 51% in under a year, beating the 30% forecast by month six.
- Ran alpha testing (offline usability tests and survey) whose findings shaped the roadmap: favorites, personal account, and detailed order tracking.
- Created the website redesign concept, validated in 11 customer interviews (8.55 vs 7.41 average score). Refined it into the final version and onboarded a new designer.
- Designed Reorder Flow for web and app with the PO (+30% repeat order conversion in A/B test) and Favorites Lists (+23% items added).
- Designed admin tools and merchant center (merchant grid, orders, stop lists, moderation, promo mechanics). Shipped National Cashback card payments within a week.

Product Designer — FuseBase (formerly Nimbus) — Jan 2023 – Feb 2024
SaaS platform for team collaboration and knowledge sharing • Remote

- Redesigned the product interface; the new design remains in production.
- Mentored a junior designer on product thinking and working with cross-functional stakeholders.

UI/UX Designer — Awesomic — Mar 2022 – Feb 2023
Global design service

- Led several client projects concurrently, collaborating directly with global clients: requirements definition, presentations, and feedback iterations.

UX Researcher — Zakaz.ua — Nov 2021 – Apr 2022
Grocery delivery platform

- Planned and ran interviews and surveys, built user personas and customer journey maps, transforming insights into actionable product recommendations.

UI/UX Designer — DOIT Software — Feb 2020 – Oct 2021
Software development company

- Designed Headache Calendar, a medical app for a Norwegian client created with neurologists (rated 4.7 on the App Store).

UI/UX & Web Designer — Quantixon, Lemon & earlier roles — 2017 – Jan 2020
Landing pages, web products, redesigns, and user research.
